

FALL SOIL CARE - Fall #4 2016

Make Sure You Have a Fall Soil Sample to Ensure Proper Nutrient Applications

Soil Testing for
Precision Agriculture

The SoilBiotics Soil Testing Program provides a soil analysis that aids in determining pre-plant and side-dress fertilization requirements. It was created by GMS Labs and SoilBiotics with certain criteria to provide an understanding of the crop production capabilities of each field in terms of salinity, soil type, water holding capacity, percolation, and much more!

To learn more about the SoilBiotics Soil Testing Program please click on this link:

Please join SoilBiotics at the Greater Peoria Farm show in Peoria, Illinois. We are joining with Aim for the Heartland/GMS Labs in a combined booth. The tradeshow will be November 29th-December 1st. Tradeshow hours are from 9am to 4pm. Come out and visit us in Peoria!

Does Your Fall Soil Sample Indicate a Micronutrient Deficiency?

If your fall soil test indicates a micronutrient deficiency, make an application of our proprietary blend of **4 – Ultra Boost** & **5 – MicroNutrient Boost** along with your dry N-P-K. This blend provides chelated micronutrients along with a carrier containing humic acid to enhance chelation of both the micronutrients and applied fertilizer. We do the blending at no additional cost and ship it to you ready to go. Apply at a rate of 1 gallon blend per 1 ton of dry fertilizer.
