

THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

JANUARY 2019

OS 46 Open House

Our new facility is up and running, producing SoilBiotics **OS 46**, a ready-to-use fertilizer with a unique formulation of high-quality 46-0-0 urea and SoilBiotics **4 – Ultra Boost**. We will be having an open house on **Friday, March 1 (10:00 a.m. to 4:00 p.m. at our offices, located at 2902 W. State Route 17, Kankakee, IL 60901)** to allow ag retailers and producers the opportunity to learn about our new product, plus get updated information on the SoilBiotics Conventional and Organic Growth Systems and Specialty Products.

Group tours of our facilities will be conducted on a rotating basis as people arrive. Beverages and snacks will be served, and a lunch will also be available. All attendees will also receive an **OS 46** goodie bag as our thank you for coming.

If you would be interested in attending, please RSVP to marketing@soilbiotics.com or call the office at 815-929-1752 no later than February 15th to be placed on the attendee list. **We do ask that you provide your e-mail and phone number in case we need to postpone the event due to weather. This information will remain confidential. Make-up date will be the following Monday, March 4 if weather causes a delay.**

Time to Plan Your Pre-plant Soil Maintenance Program

SoilBiotics products can help you get your production factory, the soil, into optimum shape this coming Spring. That means better moisture absorption...less nutrient inputs needed...lower costs.

Products (see product labels on website for precautions):

- **Organic 2r - Soil Boost** with spring applied dry fertilizers to improve soil structure, maintain nutrient availability, and stimulate microbial activity. (This product is used in both Conventional and Organic programs).
- **3 - Growth Boost** plus **SB5500*** with UAN and herbicide to help burn down and stimulate soil microbes to break down crop residues. Organic practices should use **Organic 3r - Growth Boost** plus **SB5500*** with **eFISHnt 5-1-2** for residue digestion.
- **4r – Foliar Concentrate** for quick starting your seedlings and better emergence.
- **Organic 5r – Soil Boost EA** to increase or enhance micronutrient uptake while improving and replenishing depleted soils.

- **SB4400****, **eFISHnt 5-1-2** and **Organic Blend 5-0-0** to aid in seedling germination, increased microbial population, increased nitrogen fixation and nutrient availability.

Benefits:

- Reduced compaction, increased aeration and improved drainage.
- Get into the field days faster to plant your crop.
- Conserve applied fertilizers and chelate soil-bound nutrients for greater availability.

***SB5500** is a proprietary blend of enzymes and native microbes to aid in residue digestion.

****SB4400** is a consortium of living beneficial microorganisms.

Looking to have a Winter Meeting? Talk to your SoilBiotics Rep or call SoilBiotics today!

Upcoming Shows

To allow our staff and their families to enjoy the holidays, the SoilBiotics offices will be closed all-day Monday and Tuesday, December 24th and 25th. Office hours for the rest of the week will be 9:00 a.m.-1:00 p.m. We will also be closed Monday and Tuesday, December 31st and January 1st.
