

# THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

MARCH 2019

## OS 46 Open House a Success!

Many thanks to all those who took the time to attend our open house on Friday, March 1 at the main office and new blending facility in Kankakee. This event gave ag retailers and producers the opportunity to see our new facility and learn about **OS 46**, a ready-to-use fertilizer with a unique formulation of high-quality 46-0-0 urea and **SoilBiotics 4 – Ultra Boost**. Ask your SoilBiotics representative about this exciting new product!

## Product Tips

**It's springtime and the sound of tractors and planters will be competing with the birds for attention. So here are a few tips as you head for the fields.**

**Residue Breakdown:** We recommend you add our **SB5500** and **3 - Growth Boost** to herbicide and UAN applications for accelerating the digestion of crop residues, which will release additional nutrients to your growing crop. However, if you are using glyphosate for burn down, substitute **Growth Supplement 30** for the **3 - Growth Boost**. In organic programs, use **Organic 3r - Growth Boost**, **SB5500** and **eFISHnt 5-1-2**. We recommend using flat fan spray nozzles.

**Fertility:** For conventional programs, use **OS 46** in accordance with recommendations of a qualified individual or institution, such as, but limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan. For organic programs, broadcast **Organic 5r - Soil Boost EA** to increase the availability of soil nutrients and applied organic fertilizers.

**Stabilizing Nutrients:** At planting, we recommend you apply in furrow or 2 x 2 **eFISHnt 5-1-2**, **SB4400**, **3 - Growth Boost** (conventional programs) or **Organic 3r - Growth Boost** (organic programs).

**PLEASE CONTACT YOUR SOILBIOTICS REPRESENTATIVE OR CALL THE SOILBIOTICS OFFICE FOR APPLICATION INFORMATION.**

**Product Notes:**

**SB5500** is a proprietary blend of enzymes and native microbes to aid in residue digestion.

**SB4400** is a proprietary blend of enzymes and native microbes to stimulate healthy plant growth.

**eFISHnt 5-1-2** is a liquid fish plant nutrient concentrate.

**Growth Supplement 30** is a foliar applied nitrogen stabilizer.

## Don't Forget Our Spring Discount Program for Organic 5r – Soil Boost EA

For orders of **Organic 5r – Soil Boost EA** placed between March 1, 2018 and March 31, 2018, to ship no later than April 30, 2018, receive \$50 off per half ton, \$100 off per ton, \$125 off per ton when you order four or more pallets.
