

RESEARCH FOR RESULTS

SoilBiotics program produces better berries on this 2015 Strawberry crop

SoilBiotics' products are making a big difference in yield with markedly better results in this California Strawberry crop. Larger and darker green leaves, plus a substantially larger berry are indicated (as shown on the right of image A), helping to increase overall yields. Image B shows the control plants, which are shorter in height on the left. The SoilBiotics treated plants are on the right, and show a taller, more filled out plant.

The SoilBiotics program consisted of the following products & amounts:

- 300 pounds per acre of **Organic 5r – Soil Boost EA**
