Soil Amendments

Growth Boost

Growth Boost is a powerful, liquid humic soil amendment made from high-quality Leonardite that gets your crops off to a strong start. It enhances nutrient uptake and improves soil structure for fast, early growth. **Growth Boost** is compatible with most conventional liquid inputs and can be applied in-furrow, 2x2, or foliar or broadcast sprayed depending on timing. **Growth Boost** is non-toxic, safe to handle and contains no microbes or bacteria and can be applied to most soils and crops.

Features:

- Enhances the overall ability of the soil to retain moisture
- Soil retains water soluble inorganic fertilizers in the root zones and leaching is reduced
- Has the ability to increase organic matter and Cation Exchange Capacity in the soil
- Can be applied to most soils and crops

Benefits:

- Improves the biological structure of the soil by helping to neutralize both acid and alkaline soils which regulate the pH value of the soil
- Improves and optimizes the uptake of nutrients, micronutrients and water by plants, thereby increasing plant efficiency and increasing yields
- Promotes the conversion of nutrient elements (N, P, K and trace elements) into forms available to plants

See product label and safety data sheet for any cautions or restrictions.
