

THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

DECEMBER 2020

Big Changes on the SoilBiotics Website

Our product offerings have gone through significant changes in the years since we started back in 2010, and as a result we decided to consolidate products into four primary categories. You can now find these listed under the **PRODUCTS** tab on our website as **Seed Treatments**, **Soil Amendments**, **Fertilizers**, and **Specialty Products**. All of the SoilBiotics products you've come to know are incorporated into one of the categories.

Our website continues to evolve as we do, and we encourage you to visit often at

www.soilbiotics.com

If you have any questions regarding the changes, please call the office at 815-929-1752 or contact us at

marketing@soilbiotics.com

Thank You!

We don't need to remind anyone that it's been a trying year for everyone. We want to express our sincere thanks and deepest appreciation for your trust in SoilBiotics. Support of local businesses and growers is the glue that holds our economy together. Best wishes to you and your families for a wonderful holiday season and a great 2021 from the SoilBiotics team!

Holiday Hours

The SoilBiotics offices will be closed for the Christmas holiday on Thursday, December 24th and Friday, December 25th. We will then reopen the next week for regular hours December 28th-30th, and then close for the New Years' holiday Thursday and Friday, December 31st and January 1st.

End of the Year Recommendations

We know we've mentioned our Seed Treatments often, but it's still a good idea to keep these top of mind as we move into the winter. Note that we did not say winter downtime, because we know farmers don't do downtime. Jobs simply move from the **Now** pile to the **Later** pile. So, remember to get your seed treatment ordered! Our seed treatments have been tested against a variety of both organic and conventional competitors, as shown in 4-year Multi-State trials we have posted on our website under Products/Trials & Results. These are easy to use stand-alone seed treatments that are compatible with most other organic seed treatments and can also be use in conventional programs.
