

THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

DECEMBER 2021

Beat High Fertilizer Prices!

Record high fertilizer prices have growers scrambling. Using Humic substances to help existing/applied soil nutrients work better is an economical option for growers now and in the spring. Here's one example!

OS 46

SoilBiotics **OS 46** is a unique urea/humic product that has been field tested for performance. Of note to growers dealing with record high fertilizer prices is that **OS 46** has been shown to be capable of **working better at lower applied N rates**. In a field trial with three field segments: (1. **OS 46** applied at 135-units per acre, 2. **ESN** applied at 180-units per acre, and 3. **OS 46** applied at 180-units per acre), the **OS 46** segment applied at lower 135-unit per acre rate outyielded the 180-unit **ESN** by an average of 8 bu./acre and 180-unit **OS 46** by an average of 3 bu./acre.

DTN/Progressive Farmer

Also, recent articles in major ag publications show that use of Humic substances is a great option for combating high fertilizer prices! Here's an example: <https://www.dtnpf.com/agriculture/web/ag/crops/article/2021/12/02/considering-new-fertilizer-additive>
