

THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

JANUARY 2021

Use Your Crop Residue to Profit!

We recently published the results realized by a SoilBiotics customer using our Residue Digester program to return nutrients to the soil. The soil tests prove that you can profit by conserving what you already have! [See the results here](#)

Upcoming Shows

SoilBiotics will be participating in the MOSES Organic Farming Conference virtual farm show - Growing Stronger: Collaborative Conference on Organic & Sustainable Farming, taking place Feb. 22-27, 2021. Register today and plan to talk to our representative. For more information visit the MOSES website [here](#).

New Video

We've just finished a new video on SoilBiotics for our 10th Anniversary. [Click here to view](#). We will be adding this and other videos to our website as they are completed.

Product Recommendations for the Coming Spring Season

SoilBiotics **21Ca + 17S** is a Calcium-Sulphate product formulated to maximize nutrient uptake and enhance microbial activity in Conventional programs. This product is granular, dust-free, and spreads easily and uniformly in one pass at 60'-70'. It contains no Phosphorous so is suitable for P-restricted and P-sensitive zones. This allows growers to correct nutrition without overlapping P and K. A high-solubility formulation allows SoilBiotics **21Ca + 17S** to begin working on contact with the soil, providing immediate nutrition to plants.

Soil Boost with spring applied dry fertilizers will help to improve soil structure, maintain nutrient availability, and stimulate microbial activity. This product may be used in both Conventional and Organic programs.

Growth Boost plus **SB5500** with UAN and herbicide to help burn down and stimulate soil microbes to break down crop residues. Organic programs should use **Organic Growth Boost** plus **SB5500**.

SB Super Sweet is a unique new liquid formulation of natural sugars. It is a source of quick carbon consumption for feeding and increasing populations of bacteria and microorganisms in soils.

Seed Treatments: Organic 1r – Seed Treatment increases the ability of seedlings to quickly outgrow insect and disease pressure. SoilBiotics **Organic 1r – Seed Treatment** can be applied to seeds up to 5 month's pre-plant, and can be used in both Organic and Conventional programs. **Seed Start 200**, a new seed treatment that contains a unique combination of Humic Acid along with a consortium of living breathing micro-organisms designed to boost plant and soil microbial activity.

Winter Meetings

Are You Looking to have a Winter Meeting? Talk to your SoilBiotics Rep or call SoilBiotics today! Depending on COVID 19 restrictions we can accommodate small meetings and also ZOOM conferences.
