

# THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

June 2024

## Holiday Notice

The SoilBiotics offices will be closed Thursday, July 4th and Friday, July 5th for the Independence Day holiday. We will reopen for regular hours on Monday, July 8th.

## More on Summer Inputs

Here in Illinois, it's been an up and down spring. Rain in some areas has been sporadic and June has turned into a scorcher for most growers. As we enter the summer months, don't forget that SoilBiotics has a complete line-up of products to help your crops thrive in poor conditions. These products can help your plants through heat and drought stress and help make applied insecticides and fungicides more effective against pests.

Check out **SB Super Sweet**, a unique liquid formulation that enhances photosynthetic natural plant production of sugars in crops. Higher cellular sugar content increases plant health, allowing them to resist pests on their own. It is also a source of quick carbon for feeding and increasing populations of bacteria and microorganisms in soils.

If you're including glyphosate in post-emergence herbicide applications for Roundup Ready or Liberty beans, we recommend that you add **Growth Supplement 30** to improve herbicide effectiveness, stimulate growth, and control yellow flash.

**For a slow-release, non-burning source of N, check out eFISHnt**, SoilBiotics' fish emulsion based liquid organic fertilizer concentrate. It is designed for use in conjunction with your current fertilizer plan,

whether organic or conventional. **eFISHnt** is a rich source of nutrients that slowly break down and release nitrogen into the soil. This product is OMRI listed.

**Benefits of eFISHnt:**

- Provides slow release of N
- Eliminates burn when applied with pesticides, oils or adjuvants
- Is an excellent food source for soil microbes, contributing to robust growth of microbial colonies, enhancing the transfer of nutrients between plants and microbes
- Relieves plant stress in the event of drought, heat, and excessive water conditions

## SoilBiotics Sponsors Podcast

SoilBiotics is sponsoring the **Rooted In Organic** podcast. This is a farmer-to-farmer podcast, and you can pick up a lot of terrific tips from fellow farmers. Visit their website and listen to the current and archived podcasts at <https://www.rootedinorganic.com>.
